

Slava Tokarev (TBI '96) Receives International Recognition

SEE Program Alumnus Slava Tokarev (TBI '96) has won 2nd prize—a \$10,000 award—in a competition put on by "Global Energy" for developing energy efficient operating conditions in district heating networks.

“Global Energy International Prize is a unique award intended to assist international cooperation in solving the most important nowadays problems in the field of power generation.

The Prize is awarded for scientific achievements in the following spheres:

- Increasing energy efficiency;
- New opportunities of development of power engineering;
- Alternative energy sources;
- New methods of energy conversion;
- Energy saving and energy transmission. “
